Is the man who thinks he can".

The pearl is considered as one of the most beautiful jewels. It is the one gem that is not dug up from a mine in the earth. It is grown in the shell of an oyster. The oyster does not make the pearl for the purpose of adorning the necks of women. It makes it only as a means of self-protection. To protect itself from the object like a grain of sand, the oyster begins to cover the object with a thick fluid which is secreted in its own body. When this layer hardens, an irritation begins, and another layer is added.

Questions:

- Which is considered as one of the most beautiful jewels?
- What is unique about that jewel?
- Where is it grown?
- Why is the pearl made?
- How does the oyster protect itself?
